THE STATE OF APPRECIATION

In the cryptocurrency world, a world that is ever changing, conversations at times can become... very passionate.

The atmosphere can get pretty tense and a certain amount of “fun” can seem to be missing.

Spice aims to change this.

The beginnings of Spice were simply the test of an idea. The idea that fun can still exist despite passionate discourse.

Spice is an “appreciation” token, meaning that someone posts something, and if it is worthy of recognition, they are given Spice as that token of appreciation.

The question is this:

“Would cryptocurrency enthusiasts be more willing to show appreciation to others, by tipping each other a token that was NOT a main currency yet is fun and interactive?”

The resounding answer as we found to be is “YES!”

What resulted almost immediately after launch, was nothing short of amazing.

People loved Spice!

In no time at all, Spice was being sent between Many users in just about every crypto related telegram group and beyond!
